

MICRO PROBE SYSTEM FOR LCC CHIP

MPS - PT LLCC : -40°C~150°C

MPS - LN2 LLCC : 80K~373K

The Micro Probe system for LCC Chip enables you to contact a number of electrode points with the help of a multi-pin socket placed at the center. Just like our iconic probe station, this chamber also has a small internal volume performing under the various environmental conditions; vacuum, temperature, gas flow, humidity, and light irradiation. There are 28pin and 48pin models available
